

# compact

for a sustainable | **ventura county**

Residents are joining with city and county leaders to create a vision for the long-term future of Ventura County. The vision will serve as a blueprint for addressing issues such as housing costs, traffic congestion, economic vitality, and a county response to climate change. All cities and the county will make a compact to address common growth issues.

The effort starts with Map-the-Future workshops where participants will explore the future of the county and discuss which issues they care most about. Don't be left out of the discussion!

For more information please visit
